The subject area is the best farm land in the County. It should be encouraged to be used for Agriculture, over.

Thank you for sharing your responses with us.

There is much better areas for industrial development, such as Hawks P. and the Mottman Industrial because these are gravel areas. The Tumwater area is sandy loam, a rare productive farm land. The Port also own land in Grand Mound also a gravel area very suitable for industrial development. The port now spends its resources to clean up environmental damage. Some day the Port will pay to reclaim this farm land. Farm land is compatible to urban development since food production is essential for living.

If the port is unable to control its need to destroy this farm land, it should buy development right on farm land that is under threat of development. This should be done acre for acre.

Respectfully Submitted
